

US NAVY SHIP BRANCH NUMBERS

Document Prepared by Greg Ciesielski

Numbered Navy and Marine Corps Post Offices Ship Branch Numbers

Ship Branch Numbers (15000 & 16000s)

In September 1944 the Navy requested and received permission from the POD to designate post offices on vessels by numbers in the 15,000s which later expanded into the 16,000s. What is interesting in this is that the POD did not consider this to be a financial accounting number in the same sense as the 10,000 numbers even though they were. This was probably because ship post offices were already being handled by the NY Post Office and there was a POD system already in place. In many POD files, ship branch numbers are either handled differently or are not even listed. Shortly after the war ended the ship post office numbers began to revert back to the ship's name. Most confusing is that branch numbers were still being assigned while existing numbers were being phased out.

In the listings below, the date the number was assigned to a ship is listed first, however, this date is not the date the number was first used. For example, Branch 16096 was assigned to the *USS Drayton* but the ship was decommissioned before the cancellers were to be put into use. Some of these branches had money order business and others did not. Cancels with Branch Numbers were phased out starting in late 1945. Numbers with money order business are listed with each entry.

It is suggested that for listings of ship cancellers and usage, one should see the *Catalog of United States Naval Postmarks*, edited by David Kent and published by the Universal Ship Cancellation Society.

Note: ship covers having a branch number in the cancel not listed below were mailed from a shore facility.

Figure 35: *USS Aulick* cover with branch number in dial.

15000 (without MOB)

USS Mizpah (PY 29) 15 Oct 44
Number deleted 22 May 45

15001 (with MOB)
