MS. MARGE HOLTZ, P.A.O. - MILITARY SEALIFT COMMAND
THE US NAVY IN "DESERT SHIELD - DESERT STORM" by Dept. of the
Navy, Office of the CNO, 15 May 1991

On 2 Aug 1990 Kuwait was invaded by land and airborne forces of Iraq. On 6 Aug the UN Security Council adopted Resolution #660 condemning the invasion and demanding the withdrawal of Iraqi forces. On 8 Aug Pres. Bush ordered US forces to Saudi Arabia. On 18 Aug the USS ENGLAND made the first interception when the Chinese freighter HENG CHUNG HAI was warned and boarded. On 29 Nov 1990 the Council passed Resolution #678 authorizing UN members to use "all means necessary" to enforce all previously adopted resolutions.

While the UN Security Council debated and adopted resolutions, the US and other countries began the process of moving air, sea, and land forces into the Persian Gulf. Operation Desert Shield became Operation Desert Storm on 17 Jan 1991 with the launching of 52 cruise missiles. The US Navy and US Air Force carried out missile and bombing attacks against Iraqi forces in Kuwait until the end of the hostilities. At sea the US Navy's battleships lent gunfire support to troops along the coastal plain. Minefields were cleared, the embargo was maintained and supplies were shipped in and dispatched to the areas of operations. Ship-based US Marines carried out a practice amphibious landing. Other naval forces attacked and cleared oil platforms and small islands off of the Kuwaiti coast. US Navy SEAL teams

landed at several points along the Kuwaiti coast to gather intelligence.

The list of participating ships that follows is based on publicly available information. As the cease-fire was declared on 11 April 1991 I have used that as my cut-off date as far as naval participation is concerned. Other ships were rotated into the Gulf, northern Indian Ocean and the Red Sea after 11 April but they do not appear on this list. Similarly, ships that did not transit the Suez Canal into the area of hostilities are not included in this list. French naval forces transited the Suez Canal on their way to Djibouti. They helped enforce the maritime blockade in the Red Sea. These Djibouti-based vessels are so indicated in the column labelled "Role."

There are no specific "On-Station" dates for the US submarines. The dates given represent their dates of deployment, i.e. from the time they departed for patrol until the time they returned.

On 11 April 1991 the Military Sealift Command initiated Operation Desert Sortie, the removal of US men, equipment from the Gulf. Also included in this operation was the removal of captured Iraqi equipment. This operation continued into early 1992.
